2025: PM and wind direction

High PM: PM2.5 OR PM10 reaches yearly quarter-hour q95. Wind >=1 m/s; sectors require >=96 quarters on >=5 days.
Reported directions differ by about 73 degrees; azimuth alignment is unverified. Do not infer transport origin.
Missing sectors are not zero; adjusted means are in the CSV. Earlier-than-15-February-2024 observations excluded.
